

1 Examiner Interview

2 A telephone interview took place between Examiner Aristolelis Psitos and
3 Emmanuel Rivera on February 27, 2007. In particular, discussion took place
4 regarding claim amendments overcoming the cited primary reference U.S. Patent
5 No. 6,262,777 to Brewer et al (Brewer) used in the pending 103 rejections.

6 It was discussed that Brewer teaches the alignment of audio frames with
7 video frames. Independent claims 1 and 11 have been amended to recite
8 “analyzing at least the read subset of audio content to quantify optical drive read
9 accuracy of the audio content”. This element is not taught or suggested by
10 Brewer.

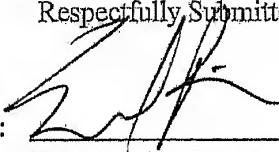

11 Independent claims 1 and 11 have further been amended to recite
12 “determining whether additional sector reads are necessary” which finds support
13 on page 20, line 3 (first complete paragraph) of the specification and is not taught
14 or suggested by Brewer.

15 Claims 1, 3, 4, and 11 have been amended to address objections raised in
16 the Action.

1 **CONCLUSION**

2 All pending claims 1, 3-11 are in condition for allowance. Applicant
3 respectfully requests reconsideration and prompt issuance of the subject
4 application. If any issues remain that prevent issuance of this application, the
5 Examiner is urged to contact the undersigned attorney before issuing a subsequent
6 Action.
